Happy w Year Tim...

The Westchester Town Center BID Board has voted to improve the tree wells throughout the District by installing decorative inserts. The inserts are an epoxy pebble mix and you can see some of our test installations on 87th Street.

One of the reasons we are making this effort is to eliminate potential tripping hazards. Also reduced maintenance costs and improved / unified streetscape appearance.

On Sunday I noticed that the tree wells in front of Truxtons needed to be filled. I'd rather have the new inserts installed than to spend money on decomposed granite. With your approval, I'll have it done.

Let me know your thoughts.
